

CS4 SEAL Data Sheet

The Acme **CS4 Seal** is a variable length cable seal manufactured from high quality materials. The locking body mechanism is protected with a high-impact ABS plastic and the cable is manufactured from non-preformed galvanised steel. The cable has a welded tip for ease of locking and should the cable be cut it unravels making it impossible to re-lock the seal again without showing obvious signs of tampering. The design of the plasticised body allows a large marking area for bar or QR coding. The seal requires cutters for removal.

Technical Data

Recommended Applications

Trailers, Containers, Rail Freight, Refineries, Warehouses.

Material

Body - ABS plastic cover with steel lock mechanism
Cable - Galvanised steel

Available Cable Lengths

20cm – 400cm

Cable Diameter

1.6mm

Average Tensile Strength

100kg

Marking

Laser or Foil marking
Consecutively numbered as standard
Optional Customer name/logo
Optional Laser Bar or QR coding

Colours

Foil and Laser marked: red, blue, green, yellow, orange, black, white.
Other colours may be available on request.

Packaging

Standard Packaging (30cm wire length)
100 seals per bag, 1000 seals/carton
Carton Dimensions: 40cm x 26cm x 27cm
Carton gross weight: 10.5kg
